

1. Institution

Chamber of Crafts Hildesheim-Süd-niedersachsen

2. Name and duration of the sub-project:

New markets of vocational training
01.07.05 – 31.12.07

3. Target-group

a) general information:

The sub-project does not work directly with (groups of) young people but informs enterprises and schools about alternative, more practically oriented vocational training possibilities for

- disadvantaged young people with problems in their social background and education
- young people with migration background

b) background:

These target-groups are especially threatened by unemployment for two reasons:

- general reduction of apprenticeship / vocational training
- lack of adequate apprenticeships / training possibilities especially for the target-group

4. Objectives

- promotion of 2-year and 3-year vocational trainings with reduced requirements at regional SME and the participating schools (e.g. floorer, service technician for bicycles etc.) with the result of:
- better recognition (name, contents) of the alternative vocational training possibilities
- creation of additional apprenticeships / vocational training
- implementation of vocational trainings with reduced requirements as new educational segment on the market of vocational training

5. Project description / Activities

- consulting and information of enterprises, teaching staff and young people about 2-year and 3-year vocational trainings with reduced requirements
- Acquisition of apprenticeships / vocational training
- Identification of traineeships / placements, which may become “door openers” for vocational training
- Build-up of co-operative partnerships beyond the strategic partnership

6. Contact

position	Managing Director transnational work	Sub-Project management,	Vocational-training-developer
