

### 1. Institution

Walter-Gropius-Schule, Vocational School

### 2. Name and duration of the subproject:

MIGRATION

01.07.2005 – 31.12.2007

### 3. Target group

a) general information:

- Group size: 2 classes of a vocational preparation course in a special form for foreigners and resettlers (BVJ-A), each with approx. 8 students
- Age between approx. 15–17 years
- Average age: about 16 years

b) background:

- Students with inadequate German language competence
- Possible causes: students with learning disabilities and without any school-leaving qualification who partly have been living in Germany for a short term only
- Students are still required to attend school
- Students have major problems with the integration into the working life

### 4. Aims of the project

- Compilation of individual competence profiles for the young people
- Promotion of social and vocational integration
- Promotion of the German language competence and training ability
- Leading to a stable choice of career through job oriented activities
- Development of a regional network
- Examination and further development of the concept

### 5. Description of the project / activities

The social and vocational integration of the young people in the BVJ-A classes is to be upgraded. Therefore, in close cooperation with further schools and institutions of the region a regional network shall be developed and sustainably established. For this purpose among other things following activities are planned: compilation of competence profiles, social training, key qualification "German on the job", job oriented activities, promotion plans, working register, work placement register and apprenticeship training position register, compilation of a kind of life planning and choice of career, work placement exchange, setup of a regional network.
